

The Printer is Dead

(if he can't get the program completed)

Joe the Printer was busy getting the program ready for the upcoming Rio Hondo Symphony concert. He had received the names of each of the 3 composers (Aaron Copland, Wolfgang Mozart, & Peter Tchaikovsky), the 3 pieces that were to be performed (Eine Kleine Nacht Musik, The 1812 Overture, & Rodeo) and the order in which they were to be performed (first, second, & third).

After putting his papers on the kitchen table, he went to Starbucks to grab a coffee for the long night ahead. Unfortunately, while he was gone, his fourth grade son decided to get started on his Mission project. Thinking that the papers were just scraps, he used them as paper mache for the walls and roof of his Mission.

“Oh no!” Joe the Printer moaned when he returned. “This program needs to be finished by morning. I guess I’ll have to piece the information together with the little that I can remember.”

Here is the information he had to work with

1. The composer who was 1st on the program was not named Aaron
2. Eine Kleine Nacht Musik was written by the composer with the initials W.M. but the piece was not last on the program.
3. Peter, whose piece was not first, has a date in the title of his piece.
4. The third piece on the program was not about a rodeo.

Can you help Joe Printer figure out the program? Put an x in the grids that are false or a dot in each grid that is true.

Piece		Composer's Initials			Order		
		W. M.	P. T.	A.C.	1st	2nd	3rd
	Rodeo			●		●	
	Nacht Musik	●			●		
	1812 Overture		●				●
	1st	●					
	2nd			●			
	3rd		●
